Please reject the National Assn of Broadcaster's petition 04-160. They have no right to try to limit our access to information. If you try to limit information on traffic and weather, it will not make me listen to the AM stations - it will just mean I will add another car to a traffic problem that I might have avoided (everybody loses). Before XM offered this information, when traveling in other cities, I never switched off of XM - but now the information is handy.
